Cholera, yellow fever, plague, and smallpox tables 1183
Weekly mortality table, foreign and insular cities 1187

PUBLIC HEALTH REPORTS.

REVISION OF INTERNATIONAL CLASSIFICATION OF CAUSES OF DEATH.

The international classification of causes of death, which is intended for the purposes of morbidity and hospital returns as well as for mortality statistics, will be subjected to its second decennial revision next year. This system, formerly known as the "Bertillon system," was recommended by a committee of the International Statistical Institute during its session at Chicago in 1893. It was urgently recommended for adoption by the American Public Health Association, representing the sanitary authorities of Canada, Mexico, and the United States, in 1898. In the first revision, held at Paris in August, 1900, representatives of twenty-six countries participated. It is employed by the United States Bureau of the Census, by all registration States, and by nearly all registration cities in the United States. Every country in North and South America has adopted it, and it is used by Japan, and by France, Spain, Holland, Belgium, Greece, Bulgaria, and other European countries. It has also recently been adopted, after careful comparison with the system formerly in use, by the Bureau of Census and Statistics of the new Commonwealth of Australia.

At the recent meeting of the American Medical Association at Chicago, the house of delegates unanimously resolved: "That the International Classification of Diseases and Causes of Death be recommended for all official morbidity and mortality statistical reports."

It was proposed in the resolutions adopted by the American Medical Association at Chicago that inquiry be made as to the possibility of holding the meeting for revision at Washington in 1910 in connection with the International Congress of Hygiene and Demography, but the preliminary announcement just issued by Doctor Bertillon, at the request of the ministry of foreign affairs of the French Government, indicates that the year 1909 has been chosen.

UNITED STATES.

[Reports to the Surgeon-General, Public Health and Marine-Hospital Service.]

Reports from San Francisco, Cal.—Plague-prevention work at Emeryville, Cal.

Passed Assistant Surgeon Blue reports, August 1:

EMERYVILLE, CAL.

Week ended July 26.

Sick inspected	36
Premises inspected	1,126
Rats trapped	80
Poisons placed	6,804
Notices served	1

Outgoing quarantine transactions.

Passed Assistant Surgeon Hobdy reports:

Week ended July 25.

Vessels fumigated and certified	39
Vessels certified	58

Report from Seattle, Wash.—Plague-prevention work.

Passed Assistant Surgeon Glover reports, August 3:

Week ended August 1.

Date of finding of last plague rat	July 9, 1908
Rats received	1,259
Rats necropsied	1,217
Plague-infected rats to date	20
Vessels inspected	4
Vessels fumigated	8

STATISTICAL REPORTS OF MORBIDITY AND MORTALITY, STATES AND CITIES OF THE UNITED STATES—UNTABULATED.

CALIFORNIA.—Month of June, 1908. Estimated population, 2,001,193. Total number of deaths reported to the State board of health, 2,508, including diphtheria 21, enteric fever 28, measles 16, scarlet fever 11, whooping cough 17, and 378 from tuberculosis.

Sacramento.—Month of June, 1908. Estimated population, 50,000. Total number of deaths, 68, including diphtheria 1, whooping cough 1, and 3 from tuberculosis. Cases: Diphtheria 7, measles 2, and scarlet fever 7.

FLORIDA.—Reports from the State board of health for the week ended August 1, 1908, show as follows: Enteric fever—*Jacksonville*, 7 cases; *Mulberry* and *Tampa*, each 2 cases; *St. Petersburg*, *Quincy*, *Dunnellon*, and *Ocala*, each 1 case. Diphtheria—*Pensacola*, 1 case; *Jacksonville*, 2 cases. Tuberculosis—*Jacksonville*, 3 cases; *Tampa*, 1 case.

Pensacola.—Month of July, 1908. Estimated population, 30,000. Total number of deaths, 36, including 1 from tuberculosis. Cases of contagious diseases not reported.

INDIANA—*Muncie.*—Month ended August 2, 1908. Estimated population, 34,036. Total number of deaths, 19, including enteric fever 1 and 1 from tuberculosis. Cases: Enteric fever 13, scarlet fever 8, and tuberculosis 2.

IOWA—*Cedar Rapids*—Month of July, 1908. Estimated population, 30,000. Total number of deaths 27, including enteric fever 1 and 2 from tuberculosis. Cases: Diptheria 2 and enteric fever 3.

Sioux City.—Month of July, 1908. Estimated population, 50,000. Total number of deaths not reported. Cases: Diphtheria 2, scarlet fever 4, and smallpox 3.

KANSAS.—Month of June, 1908. Reports to the State board of health show as follows: Diphtheria, 34 cases, 6 deaths; enteric fever, 70 cases, 19 deaths; measles, 85 cases, 2 deaths; scarlet fever, 51 cases, 2 deaths; smallpox, 183 cases, 1 death; tuberculosis, 110 cases, 64 deaths.

MICHIGAN.—Month of June, 1908. There were 2,515 deaths returned to the department of state as having occurred during the month of June, which corresponds to an annual death rate of 11.6 per 1,000 estimated population. There was a decrease of 400 from May, and a decrease of 138 from the number returned for the corresponding month of 1907.

Important causes of death were as follows: Pulmonary tuberculosis, 174; other forms of tuberculosis, 42; enteric fever, 27; diphtheria and croup, 11; scarlet fever, 7; measles, 10; whooping cough, 19.

MINNESOTA.—*Stillwater.*—Month of July, 1908. Census population, 12,435. Total number of deaths, 5, including 1 from tuberculosis. Cases: Enteric fever 5.

NEW HAMPSHIRE—*Concord.*—Month of July, 1908. Estimated population, 20,000. Total number of deaths, 24, including 1 from tuberculosis. Cases: Measles 28, and tuberculosis 1.

NEW JERSEY.—Reports to the State board of health for the month ended July 15, 1908, show a total of 2,589 deaths, including diphtheria 36, enteric fever 20, measles 21, scarlet fever 36, whooping cough 22, and 314 from tuberculosis.

Morristown.—Month of July, 1908. Estimated population, 13,000. Total number of deaths, 32. Cases: Tuberculosis 3, measles 1, enteric fever 2, and scarlet fever 3.

NEW YORK—*Buffalo.*—Month of July, 1908. Estimated population, 410,000. Total number of deaths, 498, including diphtheria 1, measles 4, scarlet fever 2, enteric fever 8, whooping cough 5, and 36 from tuberculosis. Cases: Diphtheria 20, enteric fever 51, measles 70, scarlet fever 101, whooping cough 35, and tuberculosis 66.

Schenectady.—Month of July, 1908. Estimated population, 77,666. Total number of deaths, 89, including whooping cough 1, and 7 from tuberculosis. Cases: Diphtheria 6, whooping cough 1, and scarlet fever 3.

OHIO—*Zanesville.*—Month of July, 1908. Estimated population, 30,000. Total number of deaths, 39, including diphtheria 1, and 5 from tuberculosis. Cases: Enteric fever 2, scarlet fever 1, and diphtheria 3.

PENNSYLVANIA—*New Castle.*—Month of July, 1908. Estimated population, 38,000. Total number of deaths not reported. Cases: Diphtheria 3, measles 4, scarlet fever 3, and tuberculosis 12.

South Bethlehem.—Month of July, 1908. Estimated population, 18,000. Total number of deaths 35, including 3 from tuberculosis. Cases: Measles 6, enteric fever 3, and diphtheria 1.

Smallpox in the United States as reported to the Surgeon-General, Public Health and Marine-Hospital Service, June 27 to August 14, 1908.

[For reports received from December 27, 1907, to June 26, 1908, see PUBLIC HEALTH REPORTS for June 26, 1908.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]

Place.	Date.	Cases.	Deaths.	Remarks.

FOREIGN AND INSULAR.

ALGERIA.

Deratization in ports.

The following is taken from the *Bulletin Sanitaire Bimensuelle*, Algiers, July 16:

Algiers.—July 1 to 15, 1908. Rodents taken by the maritime sanitary service, 1,747; examined by the laboratory of health, 216; result negative. Classification of rats: *Mus norvegicus*, 1,623; *rattus*, 121; *musculus*, 3.

Oran.—Month of June, 1908. Rodents examined, 83.

Philippeville.—Month of June, 1908. Rodents taken, 36; examined, 29; result negative.

Bougie.—Month of June, 1908. Rodents taken, 77; examined, 71. Result negative.

Bône.—June 10 to 27, 1908. Rodents taken, 261; examined, 43.

AZORES.

Plague on the island of Terceira.

The following is taken from the Veröffentlichungen des Kaiserlichen Gesundheitsamtes, Berlin, July 22:

Plague was introduced into the interior of the island of Terceira, belonging to the group of the Azores, during the first half of the month of July, apparently by emigrants returned from Brazil. To July 16, 15 cases with 8 deaths occurred. The entire island is officially declared plague infected. The neighboring islands of San Miguel, Madeira, and Fayal are apparently free from plague.

Report from St. Michael's—Plague at Terceira and Fayal.

The following is received from the Department of State, under date of August 10:

This Department is in receipt of the following cablegram from the vice-consul at St. Michael's:

"Seventeen cases with 10 deaths (from plague) at Terceira. Seven cases 2 deaths at Fayal."

BARBADOS.

Report from Bridgetown—Inspection and fumigation of vessels.

Acting Assistant Surgeon Urquhart reports, July 25:

Week ended July 25. Eleven steamships were inspected and granted bills of health. Total number of passengers, 475; members of crews, 210.

Three steamships were fumigated. No quarantinable diseases were reported for the week.

BRAZIL.

Report from Rio de Janeiro—Inspection of vessels—Mortality—Plague and smallpox.

Acting Assistant Surgeon Stewart reports, July 17:

Week ended July 12. Vessels inspected and received bills of health: July 6 the Portuguese bark *Liv*, for Norfolk, Va., in stone and sand ballast, with no passengers, and no change in the crew personnel; July 7 the British steamship *Wandsworth*, for New Orleans, in cargo, and with no passengers, and no change in the personnel of the crew; July 8 the German steamship *Seiglinde*, for New York, with cargo, no change in the crew personnel, and with 1 cabin and 3 steerage passengers; July 10 the British steamship *Spartan Prince*, for New York, with 1 new member of the crew—second engineer—signed on in this port from another steamship, 1 cabin and 3 steerage passengers, and a cargo of coffee (this last vessel was the subject of a special report, as she left her second engineer in Santos with a diagnosis of smallpox), and on the same date the British steamship *Chaucer*, for New Orleans, with coffee, no passengers, and with no change in the personnel of the crew. No other vessels left this port for United States ports during the week.

Mortality—Plague and smallpox.—Week ended July 12. Total estimated population, 811,265. Total deaths, 511. No deaths from either yellow fever or plague, although there was one reported case of the latter disease. There were 474 new reported cases of smallpox, with 215 deaths. At the close of the week there were 555 cases of smallpox under treatment in the Hospital São Sebastião.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Mengis reports:

Week ended July 30. Present officially estimated population, 10,000. General sanitary condition of this port and the surrounding country during the week, very good.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
July 24	Belize	Mobile	18	1	4
24	Corinto	New Orleans	28	4	16

CHINA.

Report from Amoy—Cholera.

The consul at Amoy cables under date of August 11: "Cholera."

Reports from Hongkong—Quarantine restrictions—Cholera, plague, and smallpox—Inspection of vessels—Examination of emigrants.

Acting Assistant Surgeon Hough reports:

Week ended June 13. Restrictions enforced by Hongkong remain as reported on March 28.

Restrictions enforced against Hongkong are as follows:

Place or port.	Nature of measures.
Singapore	Hongkong declared infected with smallpox.
Do	Hongkong declared infected with bubonic plague.
Dutch East Indies	Arrivals from Hongkong or vessels having called there are subject to five days' quarantine from date of departure, or of last plague case on board. Importation is temporarily prohibited of animal refuse, claws, and hoofs, animal or human hair and bristles, untanned hides salted or cured with arsenic, raw wool and rags, bags or sacks which have already been used, coming from or transshipped at Hongkong; also tapestry and used embroideries unless they are transported as personal baggage or in consequence of change of residence.
Burma	Hongkong declared an infected port.
Madras	Arrivals from Hongkong subject to regulations under the Venice Convention at infected ports.
Bengal	Hongkong declared an infected port.
Shanghai	Do.
Ceylon	Do.
Eastern Bengal and Assam.	Do.
Chefoo	Do.

Quarantinable diseases: Plague, 88 cases, 70 deaths; smallpox, 2 cases, 1 death.

Vessels inspected and granted bills of health, 9.

Week ended June 20. Restrictions enforced by Hongkong remain as reported on June 13.

Restrictions enforced against Hongkong remain as reported on June 13.

Quarantinable diseases: Cholera, 2 cases, 1 death; plague, 75 cases, 62 deaths.

Vessels inspected and granted bills of health, 11.

Week ended June 27. Quarantinable diseases: Cholera, 3 cases, 3 deaths; plague, 85 cases, 68 deaths; smallpox, 3 cases, 2 deaths.

Vessels inspected and granted bills of health, 6.

Examination of aliens destined from Hongkong to the Philippine Islands for the week ended June 27: Examined, 37; rejected for trachoma, 15.

COSTA RICA.

Report from Limon, fruit port.

Acting Assistant Surgeon Goodman reports:

Week ended July 25. Estimated population, 6,000. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
July 19	San Jose	Boston	46	8	0
20	Prinz Joachim	New York	139	231	13
21	Nicoya	do	54	5	0
21	Hispania	Mobile	20	4	0
23	Greenbrier	New Orleans	46	0	0
23	Cartago	do	76	3	0
24	Reventazon	New York	52	5	0

Three bills of health for Panaman ports were viséed, and certificates issued to 52 passengers bound for Colon.

CUBA.

Report from Habana—Inspection and fumigation of vessels—Yellow fever at Daiquiri—Sanitary work at Daiquiri.

Passed Assistant Surgeon Amesse reports, August 3:

Week ended August 1.

Vessels inspected	14
Bills of health issued	17
Members of crews of outgoing vessels inspected	805
Passengers of outgoing vessels inspected	498
Certificates of immunity to yellow fever issued	20
Vaccination certificates issued for Colon	21
Certificates issued to passengers bound for New York	126
Certificates issued to passengers bound for southern ports	187
Vessels fumigated prior to sailing	2

Sanitary conditions in Habana continue satisfactory. The weather is excessively hot and dry.

At Daiquiri, Province of Santiago, where 3 cases of yellow fever remained under treatment at last report, 4 further cases were reported, with 1 death and 4 discharged recovered, leaving 2 cases at the close of the week.

Sanitary squads aggregating 300 men are at work in Daiquiri.

Quarantine against Mexican ports.

Doctor Amesse further reports:

August 10. Cuba imposed quarantine against Mexican ports August 8. Nonimmune passengers arriving to-day on *Morro Castle* detained Triscornia.

Report from Santiago—Inspection and fumigation of vessels—Status of yellow fever at Daiquiri.

Acting Assistant Surgeon Wilson reports, July 28:

Week ended July 25. Bills of health issued to 6 vessels bound for the United States and its dependencies.

Two vessels were fumigated to kill mosquitoes, namely, the Cuban steamship *Julia*, bound for San Juan, P. R., and the British steamship *Bylands*, bound from Daiquiri to Baltimore. Daiquiri being infected with yellow fever, this vessel came in here for fumigation before going to Baltimore. On arriving here it was quarantined by the Cuban authorities and turned over to me for fumigation.

No quarantinable disease was reported in the city during the week.

This morning I sent you a cablegram informing you of 1 death and 1 more case. These are:

(1) J. I. B., taken sick July 23, died July 27; autopsy confirmed diagnosis.

(2) F. E., taken sick July 23; diagnosis confirmed July 26.

GERMANY.

Report from Magdeburg—Decrease in tuberculosis in Prussia—Work of service of hygiene of dwellings.

Vice-Consul Burrell reports, July 16:

From 1890 to 1906 there was an almost uninterrupted decrease in the number of deaths from tuberculosis, in absolute figures, as well as in relation to the number of inhabitants. While, in 1890, 84,086 deaths from tuberculosis were recorded, the number in 1906 was 64,459. As the population has increased during this period, the relative figures are more favorable. In 1890 there were for every 10,000 living, 28.35 deaths from tuberculosis; in 1906, 17.26.

The service of the hygiene of dwellings, as conducted by the medical officers of the districts, the police, and the health commissions, showed favorable results. Not only official bodies, but also private societies, building associations, etc., have done much to improve workingmen's homes, and among the working people themselves the appreciation of the value of sanitary dwellings is growing.

GUATEMALA.

Report from Puerto Barrios, fruit port.

Acting Assistant Surgeon Wailes reports:

Week ended July 29. Present officially estimated population, 250. General sanitary condition of this port and the surrounding country during the week, not reported.

SMALLPOX IN NAPLES.

During the week ended July 18, 18 cases of smallpox with 1 death were reported at the health office of the municipality of Naples. The 1 fatality was in the case of an infant. Two cases of smallpox were reported at Boscoreale, a small town about 13 miles from Naples.

PLAGUE ON THE STEAMSHIP "PERSEO."

On July 13, 1908, there arrived at Naples the steamship *Perseo* from various ports of Syria and from Alexandria and Messina. July 8 a passenger was embarked, among others, who was landed at Alexandria, and found to be suffering from plague. Having taken on further passengers the ship sailed on the same day for Italian ports without having been disinfected. On arriving at Naples the *Perseo* was

anchored a safe distance from shore; 106 passengers were disembarked and sent to the disinfection station on the "Molo S. Vincenzo," where all were bathed and where all clothing and baggage was disinfected. Among the passengers who had embarked at Alexandria were 3 who intend going to the United States. These will be under our daily observation for 7 days from date of arrival before their embarkation is permitted.

Smallpox.—Week ended July 12. Cases: Marano Ticino (Novara), 1; Bollate (Milan), 1; Galliera (Bologna), 6; Monte Rotondo (Rome), 8; Naples, 16; Mugnano (Naples), 1; Mirabella Erlano, 1; Montoro Superiore (Avellino), 1; Lauria, 1; Tricarico, 1; Montemilone, 1; Venoto, 2; Martico Nuovo (Potenza), 2; Cinquefrondi, 2; Polistena, 2; San Giorgio Morgeto (Reggio Calabria), 2.

Week ended July 19. Cases: S. Michele in Teverina (Rome), 1; Naples, 21; Calvizzano, 1; Ginliano, 1; S. Giorgio Cremano (Naples), 1.

JAPAN.

Report from Kobe—Inspection of vessels—Examination of emigrants—Plague and smallpox at Osaka.

Acting Assistant Surgeon Slade reports, July 14:

During the week ended July 11, 3 supplemental bills of health were granted to 3 steamers.

There were inspected 97 members of crews and 47 steerage passengers. Forty members of crews and 21 steerage passengers were bathed and disinfected and had their effects disinfected by steam. The number of pieces of baggage steamed was 149 and of bedding 42. Manifests were viséed for 11,817 pieces of freight, amounting to 1,187 tons.

Emigrants were examined as follows: Steamship *Tremont* for Tacoma, passed 16, recommended for rejection 9.

The emigrants passed, together with 5 intending passengers to Victoria by the steamship *Tremont*, were inspected, bathed, and disinfected and their effects were disinfected before embarkation.

The report from Osaka for the week ended July 4, shows smallpox 4 cases with no deaths.

MEXICO.

Report from City of Mexico—Yellow fever cases confirmed at Veracruz.

The following is received from Dr. Eduardo Liceaga, President of the Superior Board of Health of Mexico:

August 13. Five more cases confirmed yellow fever, Veracruz, on dates of July 30, and 4, 7, and 10 of present month.

Reports from Veracruz—Inspection and fumigation of vessels—Mosquitoes abundant.

Acting Assistant Surgeon Jacobs reports, July 26:

Week ending July 25. Total bills of health issued, 5; fumigated and inspected, 2; vessels inspected, 3.

Mosquitoes plentiful, chiefly *Culex*. No quarantinable diseases reported.

History of yellow fever case previously reported—New case of yellow fever.

Doctor Jacobs further reports:

August 1. The following is the history of case of yellow fever reported July 31: The patient, a Mexican, native of Orizaba, State of Veracruz, had been for eight months a resident of Veracruz. He was employed in the freight house of the Mexican National Railway. He was taken sick July 27, and removed to the isolation hospital next day. The diagnosis of yellow fever was made July 31. Patient died August 1.

This was a typical case, showing all symptoms of yellow fever during its course.

The patient resided within 20 meters of the place where the last case occurred.

August 8. One new case yellow fever this morning.

August 10. One new case yellow fever to-day.

NICARAGUA.

Report from Bluefields, fruit port—Mosquitoes present.

Acting Assistant Surgeon Layton reports:

Week ended July 21. Present officially estimated population, 2,500. General sanitary condition of this port and the surrounding country during the week, good. Mosquitoes constantly present in large numbers, chiefly *Anopheles*.

Bill of health issued to the following-named vessel:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
July 19	Dictator	New Orleans	19	0	0

Temperatures of all on board steamship *Dictator* taken just prior to departure. All normal.

PANAMA.

Report from Bocas del Toro, fruit port.

Acting Assistant Surgeon Osterhout reports:

Week ended July 28. General sanitary condition of this port and the surrounding country during the week, good. Present officially estimated population, 4,954.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
July 22	Preston	New Orleans	37	1	30	0
23	Fort Gaines	Mobile	23	0	0	0

PERU.

Report from Callao—Inspection and fumigation of vessels—Status of plague in Peru—Smallpox at Lima—Plague in Chilean ports.

Acting Assistant Surgeon Gutierrez reports, July 14:

During the week ended July 4 the steamship *California* was dispatched, with an aggregated personnel of 118 in the crew, and with 53 cabin and 70 steerage passengers. The steamer was fumigated.

During the week ended July 11, the Chilean steamship *Tucapel* and the British ship *Desdemona* were dispatched with an aggregated personnel of 114 in the crews, and with 106 cabin and 84 steerage passengers. Both were fumigated.

The following is the latest report on plague received from the Director de Salubridad Publica:

Locality.	Cases June 23.	New.	Recovered.	Died.	Remaining July 6.
Lima	8	6	3	3	8
Callao	5	3	3	1	4
Trujillo (city) / Trujillo (country)	30	5 / 31	10	23	33
Mollendo	1				1
Monsefú	1				1
Chiclayo		2		1	1

One of the cases of plague reported as from Callao belongs to Lima. In Callao there have occurred until this date only 2 cases of plague, one July 3 and the other July 14.

The Director de Salubridad reports to me that 16 cases of plague have occurred in Salaverry, port of Trujillo, since May 2.

Two new cases of smallpox have occurred in Lima; both were removed to the lazaretto.

Plague in Chile is reported as follows by the bills of health: Antofagasta, June 27, 3 cases; no deaths; Iquique, July 4, 4 cases are convalescents in the lazaretto.

RUSSIA.

Report from St. Petersburg—Cholera in Moscow and Batoom districts.

The following is received from Consul-General Ragsdale:

August 10. Cholera reported in the Moscow and Batoom districts; none in this district.

Report from Odessa—Cholera at Rostov.

The following is received from the Department of State under date of August 10:

This Department is in receipt of the following cablegram from the consul at Odessa:

Cholera Rostov.

ST. LUCIA ISLAND.

Report from Castries—Sanitary conditions.

Acting Assistant Surgeon Urquhart reports, July 20:

Week ended July 18. Sanitary condition of this port and vicinity good; no quarantinable diseases exist.

TURKEY.

Report from Constantinople—Measures taken to prevent introduction of Malta or Mediterranean fever.

The following is received from Consul-General Ozmun, under date of July 14:

The following notice is received from the Sublime Porte through the embassy, regarding the measures taken by the Imperial Ottoman Government against the introduction of the Malta or Mediterranean fever:

It has been decided by the Imperial Ottoman Government as a measure of public health to prohibit the importation into the Empire, of sheep, goats, or other animals originating in the island of Malta, also their products such as milk, cheese and meat which contain the germs of fever known as Malta or Mediteranean fever.

VENEZUELA.

Report from La Guaira—Plague conditions improved—Port practically closed to foreign commerce—Coastwise commerce permitted under quarantine.

Vice-Consul Betow reports, July 7:

The sanitary conditions of La Guaira have materially improved, only 1 case of plague having appeared since June 19.

One case occurred at Maiquetia, a suburb of La Guaira, June 28.

The physicians who formerly attended the plague cases at this port have been recalled, and the leper hospital at Cabo Blanco, where the cases have been treated, has been closed to plague patients.

Mail for foreign countries and points beyond Caracas is not accepted at the La Guaira post-office.

By executive decree the port was declared open to the commerce of the world May 29. Subsequent cases having appeared, however, the port in effect remained closed, although the above-mentioned decree was not canceled.

Coastwise commerce is permitted with a quarantine of 5 days at Los Roques, some islands several leagues off the north coast of Venezuela.

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND CITIES—UNTABULATED.

AUSTRALIA—*New South Wales—Newcastle.*—Month of May, 1908. Estimated population, 51,450. Total number of deaths, 42, including diphtheria 2 and 2 from tuberculosis.

Queensland—Brisbane.—Month of May, 1908. Estimated population, 135,655. Total number of deaths, 90, including enteric fever 1, diphtheria 2, and 9 from tuberculosis.

CANADA—*Ontario—Hamilton.*—Month of July, 1908. Estimated population, 63,256. Total number of deaths, 92, including enteric fever 2 and 10 from tuberculosis.

Quebec—Sherbrooke.—Month of July, 1908. Estimated population, 14,709. Total number of deaths, 26, including diphtheria 1, enteric fever 1, and 1 from tuberculosis.

FRANCE—*Nice.*—Month of June, 1908. Estimated population, 150,881. Total number of deaths, 239, including diphtheria 2, enteric fever 1, measles 9, and 28 from tuberculosis.

GIBRALTAR.—Three weeks ended July 26, 1908. Estimated population, 36,830. Total number of deaths, 21, including 1 from diphtheria.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 76 great towns in England and Wales during the week ended July 18, 1908, correspond to an annual rate of 11.1 per 1,000 population, which is estimated at 16,234,952.

London.—Nine hundred and fifty-seven deaths were registered during the week, including measles 32, scarlet fever 6, diphtheria 8, whooping cough 16, enteric fever 4, tuberculosis 140, and 36 from diarrhea. The deaths from all causes correspond to an annual rate of 10.4 per 1,000. In Greater London 1,355 deaths were registered. In the "outer ring" the deaths included 3 from measles, 1 from scarlet fever, and 3 from whooping cough.

Salford.—Two weeks ended July 18, 1908. Estimated population, 239,294. Total number of deaths, 145, including measles 6, scarlet fever 1, whooping cough 11, diphtheria 3, and 13 from phthisis pulmonalis.

Ireland.—The average annual death rate represented by the deaths registered during the week ended July 18, 1908, in the 21 principal town districts of Ireland was 16.7 per 1,000 of the population, which is estimated at 1,131,959. The lowest rate was recorded in Armagh, viz, 6.9, and the highest in Sligo, viz, 52.8 per 1,000.

Scotland.—The deaths registered in 8 principal towns during the week ended July 18, 1908, correspond to an annual rate of 12.9 per 1,000 of the population, which is estimated at 1,839,038. The highest rate of mortality was recorded in Dundee, viz, 16.1, and the lowest in Leith, viz, 9.9 per 1,000. The aggregate number of deaths registered from all causes was 453, including measles 2, diphtheria 2, enteric fever 1, and 19 from whooping cough.

MEXICO—*Tampico.*—Two weeks ended June 15, 1908. Estimated population, 20,000. Total number of deaths, 38, including 6 from tuberculosis.

NEW ZEALAND—*Auckland.*—Month of May, 1908. Census population, 69,149. Total number of deaths, 64, including enteric fever 3, diphtheria 1, and 4 from tuberculosis.

Christchurch.—Month of May, 1908. Census population, 55,263. Total number of deaths, 41, including 3 from tuberculosis.

Dunedin.—Month of May, 1908. Census population, 58,036. Total number of deaths, 54, including diphtheria 1, scarlet fever 1, and 1 from tuberculosis.

Wellington.—Month of May, 1908. Census population, 63,807. Total number of deaths, 53, including enteric fever 1, and 9 from tuberculosis.

OCEANIA—*Society Islands—Tahiti.*—Five weeks ended July 11, 1908. Estimated population, 4,000. Total number of deaths, 14, including 1 from enteric fever.

SWITZERLAND.—Week ended July 11, 1908. Reports from 18 cities, having an aggregate population of 876,946, show as follows: Total number of deaths, 237, including diphtheria 5, measles 1, scarlet fever 1, whooping cough 1, and 42 from tuberculosis.

URUGUAY—*Montevideo.*—Month of May, 1908. Estimated population, 309,511. Total number of deaths, 431, including enteric fever 7, diphtheria 3, measles 1, plague 2, and 52 from tuberculosis.

WEST INDIES—*Curaçao.*—Two weeks ended July 24, 1908. Estimated population, 30,400. Total number of deaths, 21.

Cholera, yellow fever, plague, and smallpox, from June 26 to August 14, 1908.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls, through the Department of State, and from other sources.]

[For reports received from December 27, 1907, to June 26, 1908, see PUBLIC HEALTH REPORTS for June 26, 1908.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
